THE EARTH IN ITS VIGOR.

The End Not Yet. The Bright Side  
of Recent Catastrophes.

[London Times.]

The moon is dead. It has not life  
enough left to ooze forth the tiniest mud  
volcano or spurt out the feeblest geyser.  
No throes ever reaches its surface, and  
not the faintest rumble is ever echoed  
from its jagged mountain sides. No  
earthquake wave can ever sweep its  
island shores, for earthquakes there are  
things of the infinite past, and the last  
drop of water quitted the surface of our  
planet eons ago. Its very atmosphere  
has deserted it, and if, indeed, there  
were a "man in the moon," he could  
never hear the sound of his own voice.  
But if by some means this mythical man  
could have witnessed the "Ischia disaster"  
and the "Java catastrophe," how  
he would have longed for any such man-  
ifestations of life were possible on his  
lifeless planet. That occurrences like  
these referred to are calamities every one  
must admit, and some may be apt to  
maintain that man's arrival in his earthly  
home has been premature, and that  
"Providence" would have acted more  
wisely and humanely had he postponed  
man's advent on the scene until the "in-  
ternal fires" had exhausted themselves.  
But when that happens, geologists tell  
us, we may look upon it as the begin-  
ning of the end. Not even the 600 de-  
grees heat of the sun which beats upon  
every part of the moon for a fortnight at  
a time is able to rouse within its bosom  
the faintest sign of life. There is evi-  
dence enough to show that one period of  
volcanic activity must have been of the  
most stupendous kind, far exceeding  
anything ever witnessed on its mother  
earth. But that has gone with its water  
and its atmosphere, and taken with it all  
possibility of life. We are told that our  
existing volcanoes, and geysers, and  
mud-holes are but the dying remains of  
what at the time must have been a vol-  
canic activity almost universal. Instead  
of spasmodic eruptions at a few isolated  
spots, we have a constant outpour of vol-  
canic matter from wide fissures extend-  
ing across the earth's surface for many  
miles.

That the earth has not, however, en-  
tirely lost its vigor is evident from the  
Java outbreak, which is the most stu-  
pendous phenomenon of the kind on  
record. So long as the old earth is equal  
to efforts of this kind we need not mind  
its latter end. When the blood leaves  
the cold extremities and the heart has  
not vigor enough to send it to the sur-  
face, the end is not far off; and when  
volcanic and earthquake manifestations  
cease from off the face of the earth, the  
end may be within almost measurable  
distance. Much of its ocean water will  
have been absorbed by the underlying  
rocks, and the atmosphere may be rarer  
and less life-giving than it is now; by-  
and-by, with the last ray of internal  
heat, and the last drop of water and last  
particle of air, all life will have vanished,  
and a dead earth will shine upon a dead  
moon. So long, then, as the mother of  
us all has any vigor left, we must expect  
it to manifest it occasionally, as she has  
done recently at Ischia and Java; so that  
lamentable and regrettable as has been  
the loss of life at these places, the cata-  
strophes are not entirely without their  
bright side. Only when the earth is as  
dead as the moon will such catastrophes  
become impossible.

Geologists and seismologists know  
pretty well the lines along which these  
manifestations of the earth's vigor are  
likely to occur; lines of weakness they  
call them, but in view of the above con-  
siderations we might call them lines of  
vigor. Perhaps when they know still  
more they may be able to tell their fel-  
lows what places to avoid in planting  
their settlements and building their  
houses. But it is doubtful if such telling  
would be of much avail. After the most  
destructive outbreaks of Etna and Vesu-  
vius, the decimated inhabitants have  
crept back to their old locations, rebuilt

their huts, and planted their vines head-  
less of the terrible lesson. Already has  
building begun again even in the shat-  
tered Ischia, and if the proper kind of  
wooden house be used possibly the next  
shaking the island gets may lead to fewer  
calamities.

We have said that the Java outbreak  
is the most stupendous on record. An  
island has been shattered and sunk and  
sixteen others have raised their heads  
above the surrounding waters. Some  
hundred thousand people have been sac-  
rificed to their mother's anger, buried  
beneath volcanic debris, or swept off the  
face of the land by the volcanic wave.  
The floor of the ocean over a wide area to  
the southeast of Sumatra has been raised  
into a high plain above the waters, and  
the effects of the general upheaval has  
been felt as far as the American coast of  
the Pacific.

There can be little doubt that the wave  
which was felt along the coast of North  
America was propagated across the  
Pacific from the Java outbreak.

## THE INDIAN MUTINIES.

[Santa Barbara (Cal.) Independent.]

A ghastly relic is on exhibition at G.  
W. Clark's place in the Morris House.  
It is the head of the chief of the two  
hundred aboriginal exiles transported to  
Santa Cruz Island, about seventy-five  
years ago, and left there to starve.  
There is a well authenticated tradition  
extant among the natives here that a  
revolt of the Indians in the vicinity, led  
by a young chief against the Spanish  
soldiers in garrison here, resulted in the  
total defeat of the insubordinate Indians.  
The males being warlike and stubborn,  
declined to work for their conquerors in  
a state of slavery, were given the alterna-  
tive of working or being banished across  
the Santa Barbara channel to the islands  
to starve to death. They refused to  
work and were shipped across the channel  
and left there without food or means of  
living or escape. The story goes that  
they died of starvation. In verification  
of this fact Santa Cruz Island is literally  
catcombed with graves, and the place  
whence Clark's bony relic was taken is  
the head of a long trench in which lay  
the skeletons of scores of the former  
natives of this vicinity. Mr. Herbert  
Gray, who found the head now in Clark's  
collection of curiosities, discovered this  
trench in which the unfortunate victims  
of war and famine were laid side by side  
after ending a miserable existence. The  
head of the chief was distinguishable by  
its fine shape and large size as compared  
to the others, and also by the ornaments  
and care evidenced in its deposit in the  
earth. It is a very interesting relic of  
ancient times in and about Santa Barbara.

"Yes, there's a heap of difference in  
boys," replied the old man, as he tied  
up a bag of oats. "There's my son  
John, for instance. Everybody beats  
him in a hoarse trade, swindles him on a  
watch dicker and leaves him out in the  
cold when he farms on others. He's  
good-hearted, but there's no business  
about him. If I had to depend on John,  
I'd die in the poor-house." He wrestled  
the bag aside, seized another, and con-  
tinued: "And there was my son Phillip,  
keen as a razor, eyes wide open, and so  
sharp that no man in New Jersey dare  
offer him a pair of old boots for a \$300  
hoss for fear of being cheated." "Is he  
dead?" "Yes, he's gone, and that was  
the sharpest trick of all. He found he'd  
got consumption, and what did he do  
but hunt up a life insurance policy, give  
his note for the premium, and come  
home and fall off a load of hay and run a  
pitchfork clear through him. Some  
sons would have hung on, and doctored  
around, and wanted currant jelly and  
chicken soup for eighteen months; but  
that warn't Phil. No, sir. He didn't  
even ask for anything better'n a \$20  
tombstone, and he said I needn't git  
that unless the marble-cutter would  
trade even up for a blind calf."

A brutal schoolmaster of French Camp  
was recently tried and convicted of  
cruelty to one of his pupils, a young lad.  
He belabored the boy with a ruler, an  
inch thick, striking him some severe  
blows on the head which laid open the  
scalp. The pedagogic was only fined  
\$15. He ought to have been mulcted in  
a much larger sum and discharged from  
his position.

Of the four homing pigeons which  
made the distance from Washington to  
Bridgeport, Conn., the other day, the  
average speed of the two that arrived  
first was 1,061 yards a minute.

### HEART DISEASE!

CURED BY  
DR. RUSH'S REGULATOR.

#### FOR HEART TROUBLES.

Wm. G. Osgoodby, the well-known safe man-  
ufacturer of Buffalo, Philadelphia, Pittsburg,  
Newark, and Atlanta, Ga., says:  
OFFICE OF OSGOODBY'S IMPROVED SAFES,  
17 S. Broad Street,  
ATLANTA, Ga., October 17th, 1883.  
DR. RUSH'S MEDICAL ASSOCIATION:  
DEAR DOCTORS.—The three bottles of "Dr.  
Rush's Regulator" I ordered were received by  
express last week. I have taken nearly one bot-  
tle and am thoroughly satisfied with the result.  
For over two years I have been troubled with  
sharp pains in my heart. My physician, upon ex-  
amination, pronounced it enlargement of the  
heart, and was unable to give me any relief.  
The trouble grew worse until I had become con-  
vinced that I could not be cured. While in New  
York City, last week, I called upon one of the  
most prominent physicians there, who charged me  
\$25 for an examination and then recom-  
mended "Rush's Regulator." Knowing you to be  
a regular Medical Association, and also the us-  
ing of "Rush's Regulator" I ordered the three bottles.  
I have not been troubled since I commenced  
taking it, but shall continue and take the entire  
five bottles so as to obtain a permanent cure.  
You have my sincere thanks.  
I am, gentlemen, Very respectfully,  
Wm. G. OSGOODBY.

### Dr. Rush's "Regulator"

has never failed to give relief. It has been  
used successfully for years in the most  
stubborn cases of heart difficulties. A positive  
cure for Enlargement, Palpitation, Fluttering  
and Fatty Degeneration of the heart. Price,  
\$1.00 per bottle, six for \$5.00. Sold by drug  
stores, or sent direct by Dr. Rush's Medical  
Association, Nunda, N. Y., U. S. A.

No. 751.

UNITED STATES LAND OFFICE.

Eureka, Nevada, February 8, A. D. 1883.

NOTICE IS HEREBY GIVEN THAT J. J.  
Falls and J. D. Lehman, whose post office ad-  
dress is in Cincinnati, Ohio, have this day filed  
their application for a patent for fifteen hun-  
dred linear feet of the "Indian Chief" mine or  
vein bearing gold and silver, with surface  
ground six hundred feet in width, situated  
in Pahranagat Lake Mining District, County  
of Lincoln, and State of Nevada, and designat-  
ed by the field notes and official plat on file in  
this office as Lot Number 29, in Township 3, South  
Range, 50 East of Mount Diablo Meridian. The  
exterior boundaries of said Lot No. 29 being as  
follows, to-wit:

Beginning at a post marked No. 1, U. S. Survey  
No. 29, whence the 4th post between Section 32
